

LANDFIRE's Open Office Hour Resources

The Nature Conservancy's LANDFIRE team

2021-01-26

1 LANDFIRE OPEN OFFICE HOURS

LANDFIRE is a multi-partner program producing and delivering over two dozen datasets and hundreds of ecological models that depict vegetation and fire conditions, past and present. These monthly LANDFIRE Office Hours provide a place to learn a LANDFIRE-based skill, discuss LANDFIRE data use and build community.

2 OBTAINING LANDFIRE SPATIAL DATA

There are multiple ways to obtain LANDFIRE spatial data-we discussed two main ways:

1. [Downloading mosaics](#). If you have plenty of storage space, work on a large landscape, or work on many landscapes we recommend downloading the mosaics, which are full extent datasets for the Lower 48 states, Alaska and Hawaii (selected and downloaded separately). For example, we will download the Existing Vegetation Type mosaic for the lower 48 states and clip it as needed as opposed to using the Data Download Site for each landscape we are working on.
2. [Using the LANDFIRE Data Distribution Site](#). If you have limited storage space, a small number of landscapes, and/or would like to download several datasets at once for them, we recommend this method.
3. For a complete exploration of ways to download LANDFIRE data visit [Get Data](#).
